The uMusic intelligent playback system actually listens to your music and learns your preferences, then makes selections based on what you like. It is ready

with just the songs you want to hear. The ADAPTiQ system was developed to adjust the Lifestyle system for a consistent, highquality performance each time you listen. Fill your living room with surround sound through tiny, Jewel Cube speaker arrays and a horizontal center channel speaker. Comes without warranty, but guaranteed to work. <http://gospel-pour-100-voix.com/fichiers/newsletter/commando-survival-manual-pdf.xml>

Amazon calculates a product's star ratings based on a machine learned model instead of a raw data average. The model takes into account factors including the age of a rating, whether the ratings are from verified purchasers, and factors that establish reviewer trustworthiness. Please try again later. argo 5.0 out of 5 stars The surround sound is great and music is good also. Not worth 4000 but at a lower price point it will fill a large room with good sound. If you can find it at a lower price buy it. One only problem is the different voltage between USA 110 volt and Italy 220 volt for many money that we paid for this bose system, i think it would be much better if all components were made in dual voltage Did not take long to see lack of newer video formats, but I could live with that. I am very happy with sound performance and have no complaints, and dont care about what material speakers are made of. They sound great and no issues. I have had remote control working the unit issues and they sent me a new remote no charge, but still operates inconsistently. I have used the hard drive very little and this is poor performance for a premium priced product. Now if they were going to upgrade the video to HDMI on this refurbish then I say that would be OK. I hope I can use as a very high priced speaker system, but the Bose tech could not say that the unit will continue to work even if I dont use hard drive. Only for 1015 minutes, tops. WIPING OUT ALL MY SAVED CDS. Now there is no stored music. So basically right now I have a basic DVD player with a decent sound system. Bottom line dont waste your money on this turkey. Or your time. However, one of the strong selling points of the system is the flexibility that the VS2 video enhancer provides, which comes with several of the Lifestyle systems. The concept of the VS2 sounds great, but in my configuration, its a paper weight. I have a DirecTv HDDVR, which can output video from 480i to 1080i.

However, when I hook up HDMI from the DVR to the VS2, and HDMI from the VS2 to the television, the only way I can get the video signal to the TV is to configure the HDDVR to put out 480i. So, I basically have to have the HDDVR downgrade 1080i shows to 480i, just to have the VS2 upgrade it back. I will have to resort to using composite video from the VS2 to the television though I have not tried this yet to get things to work right. Not using the VS2 is out of the question, as I cant see the Lifestyle 48s controls i.e. music library listing, etc. without it. I tried to argue with the Bose installer about the HDMI incompatibility, but he said not to worry about it, and use Component video, which he said offers a much better video signal than HDMI ya right. So, I give it 4 stars for sound, 1 star for video, and a 1 star for false advertising regarding the VS2 and the installer giving me false information to make the VS2 work. It will help you set up and operate your system properly and enjoy all of its advanced features. Save both the Install Guide and the Operating Guide for future reference. **WARNING** To reduce the risk of fire or electric shock, do not expose the system to rain or moisture **WARNING** This apparatus shall not be exposed to dripping or splashing, and objects filled with liquids, such as vases, shall not be placed on the apparatus. It involves use of the media center and a simple 3step procedure for storing your music. Note Your system is designed to store the tracks of regular CDs only. It will not store MP3 tracks or the contents of DVDs. If an inappropriate disc type is in the disc tray when the Store button is pressed, the media center displays an error message to indicate that storage There is no need to aim the remote at the media center. Power and mute Turns the system on and off. Selects the source last used. Mutes the volume for all connected speakers main and in other rooms. Mutes or unmutes the volume in the current room.

Source and input selectio Enters or exits the Settings menu for the current source. Enters or exits the System menu. Enters or exits the menu of the DVD disc that is currently loaded. The Lifestyle 48 system combines functionality and innovative Bose technologies, with an impressive 24-bit digital media center that utilizes an advanced DSP technology to create independent sound fields that envelop you in an unmatched surround sound experience. Bose's Lifestyle 48IV features its uMusic Intelligent Playback System, capable of digitally storing and organizing up to 340 hours of your favorite music. Also, enjoy multiroom expansion capabilities with the included Bose Link. This powerful feature enables the Bose Lifestyle 48IV to distribute your favorite audio selections to up to 14 additional areas throughout your home, with independent volume control for each area. It brings the movie theater

experience right into your home, with unsurpassed clarity and style. Innovative Bose Speaker Array With the Lifestyle 48IV System, you get the experience of a full home theater without speakers and cables overcrowding your room. The four small front Jewel Cube speakers use technological innovation to give you the effects you might expect from having rear speakers. The playlist mode offers extensive functionality. And the intelligent playback mode can learn your tastes and create a tailored listening experience. ADAPTiQ Audio Calibration Taking the guesswork out of setting up your system, Bose has introduced ADAPTiQ that analyzes your rooms dimensions and makes the adjustments automatically for optimum performance. Videostage 5 Decoding Circuitry With this proprietary Bose technology, you can enjoy fivechannel surround sound from everything you play, including older TV programs and VHS tapes originally recorded in mono.

Acoustimass Module The module delivers the clarity of pure lowfrequency reproduction down to the lowest frequencies, even at the loudest levels. Bose Link Allows other Bose speakers and systems to seamlessly connect to a Lifestyle system. So your Lifestyle system becomes the center of a wholehome solution that lets you enjoy sound throughout your home, wherever sound is important. VS2 Video Enhancer Simplifies the integration of a Lifestyle system with other video sources, including those with HDMI. Connect just one wire from the VS2 video enhancer to the back of your TV, and receive the correct audio and video with the press of one button. HighDefinition Multimedia Interface HDMI If youre looking to pump highdefinition DVDs or TV broadcasts into your home theater, the Lifestyle 48IV will do the job. It features an HDMI output, capable of upconverting video signals to 1080p HD resolution. In addition, the LS48IV offers an HDMI input for connectivity to other highdefinition components. Progressive Scan The Lifestyle 48IV features progressive scan playback, capable of scanning an entire video frame at once; scanlines commonly associated with interlaced video are drastically reduced. The result is a spectacularly clear image with no motion artifacts stairstepping, and details so sharp they seem as if theyre etched onto the screen. MultiFormat Playback Capability It offers a fullrange of playback capabilities for enjoying movies, music and images. Magnetically Shielded The four satellite and center speakers are magnetically shielded to prevent picture interference when placed near your TV or display. FullFeature Remote Control Included with this package is a fullfeature remote control capable of executing every command on the Lifestyle 48IV system. Setup disc 2 leads you through the ADAPTiQ audio calibration system process, which adjusts the sound of the system to the acoustics of your listening area. The process takes approximately ten minutes. During this time please try to eliminate any other sounds in the room that could interfere with the acoustic measurements. If there is a component connected to the Aux inputs, temporarily remove those connections Disc 2 will explain the remaining steps for you to follow Please save the ADAPTiQ headset and discs. If you move any of the speakers or furniture, or if you move the system to another room, you will want to perform the procedure again. To use the ADAPTiQ system again, you cannot simply turn it back on; you must reinstall it using the ADAPTiQ discs included with the system. Follow the first set of instructions above to reinstall the ADAPTiQ system Please feel free to share additional comments below. Page 1 Showing 111 of 11 reviews Sort by Most Relevant Most Helpful Most Recent Oldest Highest Rating Lowest Rating Most relevant reviews info Mexicanmike Mexicanmike Rated 4 out of 5 stars Great, for what IT is Posted 11 years ago. Mexicanmike By no means is this the best setup you can get for the price of the unit. That being

said, Bose is the best at what they do. The form factor is small, everything is integrated, comes with a RF remote that can program to most IR devices.

This unit is great for the average customer who is more focused on small form factor and ease of use without paying someone to setup or calibrate components. The unit doesn't have the greatest ability for expansion, minimal digital inputs, but will suffice for a HiDef dvd player, sat box, and maybe one gaming system. The universal remote will never give you full functionality on third party components. Low frequency reproduction is not by today's standards, booming, but it does give descent, clean, natural reproduction. Again, not the best for the price, but if you don't want floor standing speakers, or the wife wants something that will hide away easy on the ceiling, walls or bookshelves, Bose will tuck away nicely. My recommendation for a friend is on the terms that they are looking for what Bose offers small, easy to setup, integrated, semi-intelligent music selection, cosmetically appealing. I have this in my bedroom where space is limited and additional items are limited. For the dollar, I would buy Vienna Acoustic Grands and a good receiver with HDMI upconversion for a main room setup, in fact, I did do that. Martin Logan Abyss kills the Bose sub. I would recommend this to a friend Helpful 1 Unhelpful 0 Report Comment frankinPA frankinPA Rated 5 out of 5 stars Always wanted a Bose Posted 12 years ago. A little pricey, but if you like your home theater systems and use them often, it is more than worth the price. I also purchased the room link, and what a fantastic device this is! Awesome technology from Bose. And I must say I had an excellent experience setting up with Bose tech support and walked me thru the entire setup. After my phone call with them I was up and running in no time. I would definitely recommend getting this product I would recommend this to a friend Helpful 3 Unhelpful 1 Report Comment jlimbo808 jlimbo808 Rated 3 out of 5 stars Bose System Posted 11 years ago. Bose should drop the prices for these systems.

You do notWe can't store MP3 songs in it, that is bad part. Other than that this is the best. I would do it again and not have waited so long. It is worth the price for the sound quality you get and the ability to store CDs and retrieve any time. The unit will learn your favorites and we have also added the BoseLink to other rooms. You can retrieve your music anytime from songs stored in library. I would recommend this to a friend Helpful 0 Unhelpful 0 Report Comment JBAlabama JBAlabama Rated 5 out of 5 stars Awesome, Lives up to Hype Posted 12 years ago. JBAlabama Finally was in a financial situation to be able to afford a Bose, and have been simply amazed. Nothing that I can say about this product would do its justice. Simply the absolute best product on the market. Completely revamped our home theatre experience. I would recommend this to a friend Helpful 2 Unhelpful 2 Report Comment jim0244 jim0244 Rated 5 out of 5 stars No Better Audio Quality Posted 11 years ago. Whether you play video games in surround sound, watch movies, listen to music, or just watch TV, the Bose Lifestyle does it all. Get it, you won't regret it. All the components appear cheaply made with cheap material. I was shocked to see this after hearing how much he paid. I wouldn't knock this if it was priced right, but the MSRP on this is ridiculous. No, I would not recommend this to a friend Helpful 2 Unhelpful 3 Report Comment MCGNC MCGNC Rated 2 out of 5 stars eh Posted 11 years ago. BEST BUY, the BEST BUY logo, the tag design, MY BEST BUY, and BESTBUY.COM are trademarks of Best Buy and its affiliated companies. Up to 340 hours of music can be stored on the HDD. Remote control works through walls. Irregularly shaped Media Center hinders the stacking of other components. The latest top of the line model is no exception. Included in the Lifestyle 48 are five Jewel Cube satellite speakers, each only 11 centimetres high and consisting of two rotatable speakers stacked one on top of the other.

The Acoustimass module, responsible for the bass, looks somewhat like the case of a large PC. It measures about 40 centimetres high, 60 centimetres deep and is all black with a metal grille at the front. For its rather small size it's quite heavy. It features a flip-up transparent panel to access the controls and DVD tray. The Media Center's irregularly shaped round top and front lift-up lid is a slight hindrance as it makes it difficult to sit other components on top, like an Xbox or digital set top

box. However, where the Lifestyle 48 really shines is in its ADAPTiQ audio calibration system. The first disc includes an initial setup chapter containing an interactive demonstration on where to place each of the five Jewel Cube speakers and the Acoustimass module. It then plays a test loop through the front left and right, centre, rear left and rear right speakers to ensure you've got all the cords in the correct place. Once the basic setup is complete and verified, you are prompted to enter the second DVD. You are then asked to insert the ADAPTiQ headset to the auxiliary input of the Media Center. The headset looks similar to a set of headphones but instead of housing speakers it has two microphones that sit above your ears to measure the sound from the Bose speakers. The system then plays more test sounds, analyses the levels as you sit in your five chosen listening locations and adjusts the speaker settings accordingly. For example, it might find music of similar genres, artists or composers to songs you've rated highly. Instead of placing the rear surround speakers directly at the centre of the room, bouncing the sound off the rear and side walls creates more atmosphere, especially in smaller rooms. Even when we nudged up the volume for the battle for Isengard scene, the Lifestyle 48 reproduced perfect surround sound and bass free from distortion.

Sitting in the five locations we'd chosen for setup, it was hard to determine the source of the deep, pounding bass as it seemed to radiate around the room. The crispness from the staggeringly small speakers is astounding. Each of these supports a set of analog audio jacks and a digital coaxial connection. There is also a digital optical connection. It is surprising on such a high-end system that there is no component or digital video output, such as DVI or HDMI, for higher quality connections. One of the best things about the remote is that it doesn't rely on line-of-sight infrared but instead uses radio frequency RF so it can work through walls from adjacent rooms and even outside. Component video adapters, S-Video and composite video cables are included alongside antennas for AM and FM radio. Let's round them up. Here are some of the best. Here's what she means for tech.
