Amazon calculates a product's star ratings based on a machine learned model instead of a raw data average. The model takes into account factors including the age of a rating, whether the ratings are from verified purchasers, and factors that establish reviewer trustworthiness. See All Buying Options Add to Wish List Disabling it will result in some disabled or missing features. You can still see all customer reviews for the product. Reviewed in the United States on December 4, 2009 Let me start by saying that this is my first review of any product anywhere. I felt that I should write this because I always read user reviews before buying anything, and I find them very helpful. I must say that this printer is outstanding. I first contacted Brother support via email to find out if this printer is compatible with Windows 7, both 32 bit and 64 bit, and also with Apples Snow Leopard 10.6.2. They responded within 24 hours and assured me that it was, with downloadable drivers from the Brother Solutions Center download page. So I took the plunge and made the purchase. My printer was delivered by FedEx, a day late as usual. I like UPS so much better, but am not faulting Amazon or Brother for this. I set up the printer as per the quick start guide and turned it on. So far so good. Here comes the best part. I called Brothers technical support line to ask for assistance in downloading the drivers and software package and installing it on my systems. An initial wait time of about fifteen minutes kinda sucked, but let me tell you, these techs at Brother are top notch. I had a Windows 7 tech walk me through the install on the 64 bit system, then the 32 bit system, without a hitch at all. They then transferred my call to an Apple expert who did the same for me. I was up and running within the hour. Wirelessly and all! Amazing! Then I got to play with it for a while.

I wasted some paper trying out the scan, copy, and print features, but it was worth it. Fax works great also. The printer is compact but heavy. I set it all up by myself, but a second set of hands would help. The printer is relatively quiet for a laser. Black is BLACK! Color is beautiful and vibrant, and best of all it works perfectly on all my systems, PC and Mac. I have to say that the Brother support techs were so very good. They all spoke clear English and were easy to understand. They were all very knowledgeable about the machine and the various OS I had. Thumbs up all the way. I had considered a Samsung CLX3175FW wireless color laser, but the limited Mac support pushed me away. This printer would not play nice with the Mac or with 64 bit Windows 7. Dells tech support is the worst. Long waits and unrecognizable dialects. This MFC9320CW was THE answer. Hands down! Color printing quality is good. When printing Avery mailing labels, I place the labels inside the paper tray. The orientation for labels from the tray is printside down with the top of the labels facing towards the front of the printer. The manual feed on this model functions rather poorly. Printing is often misaligned. I load paper from the tray as I do mailing labels. Cumbersome, but it works. I sent a test fax to this printer and it was received and printed properly. Faxes are printed with a belt unit that is beneath the toner cartridges. The scan and copy functions works well. I have yet to experience the premature low toner warnings, but if I do, Ill follow the instructions for resetting the machine, as instructed by another reviewer on Amazon. When the printer is not in use, it goes into a sleep mode, so the machine can be left on for faxes without consuming too much energy. The Control Center 3 software comes in handy with its custom settings. It occurs when solid black lines are printed, in my case, with Quickbooks invoice print outs.

I will contact Brother to determine whether what is causing this. Please try again later. Terry Pawelko 5.0 out of 5 stars Was looking at a few others, but the price swayed me. I have it on a Max OS X and it was plug and play. Fantastic if you are on the edge go for it. The first page prints real fast, good print quality for documents. Photos on plain paper are acceptable which is all I need. Scanner linked right up. Set ip and use is painless. Please try again later. Please try again later. cliqster 5.0 out of 5 stars The print quality was great and the scanner feature was great. Last month, my house got hit by lightning though and I didnt have this plugged into a power strip The main board got fried and it wont power up. I will be buying another one of these, or whatever is the current model. Please try again later. Please try again later. Richard E. Pozzuto 4.0 out of 5 stars

Good fax logic. Overall, I'm extremely happy with this printer. I kick myself for not buying the duplexing version though. It would have been perfect had I. Please try again later. Please try again later. MajH 5.0 out of 5 stars Just follow instruction. The print quality is very good. You can set up the option to be in Black and white so you can save some toner. We have it in our home office, and the fan is a bit loud. The printer goes to sleep after few minutes so the fans noise is gone. You can set the time yourself very useful feature. The fax works very well, we have an answering machine installed after the printer. It functions well. Overall it's a great all in one printer. Please try again later. Please try again later. If you get it you will be forever happy but it comes with a time tag read the manual. Please try again later. Please try again later. Terri Wilkinson 5.0 out of 5 stars We decided to go laser for speed. All of our other printers have had trouble with the paper feeders and I think that is because my kids would pull the paper out as it was printing.

This printer prints fast and hopefully we will not have too hard of a problem. I have used the scanner with ease. The copier is easy as well. I did have a little issue with the manual feed tray when printing color pictures on card stock. When changed to regular paper everything worked fine. Very happy with the purchase so far! Please try again later. Please try again later. Anon 4.0 out of 5 stars Very nice print quality. Good scanning. Software is easy to use, once you manage to get it installed. The network configuration is not simple, and the software suite is bloated and complicated to install, but once you get everything set up, it all works very well. Please try again later. Please try again later. S 5.0 out of 5 stars I also have elementary aged kids who need to print reports with color graphics. This machine has been the perfect fit to meet all of our needs. And, it all came at a reasonable price. Great product. Please try again later. Please try again later. Kaz 5.0 out of 5 stars Software worked superbly. I'd rather not have so much running all the time but it works well. I put this unit on a network with two computers. The printer was picked up automatically it was so easy. The scanning feature worried me but it was also simple. Saves so much time and there's a little genie who instantly gives me pdf files on my desktop. I installed an HP quite similar. Lots of headaches. This unit is worth every penny you pay for it. If you use the right paper, the photos print out as keepers. The only thing it doesn't have is a built-in coffee maker. Please try again later. Please try again later. J. Vang 3.0 out of 5 stars The worst feature about this printer is the manual feed. It offers just only one page at a time and you still have to hold that sheet of paper straight and constantly jam. It took me almost 2 hours to print 30 sheets of card stock. If you are looking to print card stocks and manual feed this is 100% not a good choice for you to buy. Please try again later.

Please try again later. This desktop friendly printer simply makes for a great device in your home or small office. Featuring 30ppm print speeds, up to 3,000 page replaceable high yield toner, wireless connectivity, automatic 2-sided duplex printing and a 250-sheet paper input, this printer is quiet, practical and easy to use. It's the ideal partner for an individual or small team that needs consistent and high quality printing. Find something that is. Brother hll3270cdw review digital color printers deliver high quality, rich color prints, wireless capabilities, and features designed to help save time and money. Brother hll3270cdw Features Some special features of the Brother hll3270cdw review are While helping you realize your vision for your business, keep your business moving with fast print speeds and up to 250 sheets. The capacity adjustable paper tray that lets you spend more time printing and less time refilling the papers. Use the manual feed slot to print on a variety of paper types and sizes. Brother hll3270cdw printers offer easy connectivity options including built-in wireless Ethernet or USB, print wirelessly from mobile devices, or use NFC Touch to connect. Also, let's check some widely used popular brands of Brother Printers like Brother hl l2360dn, Brother hll3290cdw, and Brother laser printer 2340dw. Topics to be covered include are Brother Laser printers, the difference between Brother laser printer and simple Brother printer. Some useful features and settings of the control panel. Connect Wifi on Brother hll2360dn Printer Setup A mono laser printer, Brother hll2360dn providing good quality black and white prints for single users and small workgroups. It prints up to 2,000 pages per month. The toner cartridges for this printer

machine are rated for up to 1,200 pages for the standard yield, and 2,600 pages for the high yield. The higher yield cartridges offer the lowest cost per page and contribute to a lower total cost of ownership.

This printer is the most cost-effective when printing at lower volumes. Printing anywhere between 250 and 1000 pages per month is ideal with this machine. If you're printing any more than that, we'd recommend something like the Brother hl5450dn printer, which offers a lower cost per page at higher print volumes. Back to Brother hll2360dn. This machine only weighs around 7kg, this is thanks to the compact and simple design of the machine. Brother warranty and guarantee With the device, you get all of the warranty and guarantee the information you'd expect, a power cord, drivers for both Mac and PC, a drum, and a 700page toner cartridge. Use the quick startup guide when setting up, and you'll be printing in no time. Moving on to paper handling, this machine can carry up to 250 sheets of standard office paper, and there's also a 1 sheet manual feed slot. This can be used for thicker paper, weighing up to 163gsm and things like envelopes. Scanning with Brother Printer The main tray is only rated for paper weighing up to around 105gsm, so bear that in mind when loading the tray. You don't want to put anything in there that's too thick, as you'll likely cause the printer to jam. Brother printer AirPrint AirPrint is an Apple technology that allows iOS and OSX users to connect and print to certain devices, without the need for a driver. With it, it's easy to print full quality documents from your Mac, iPhone, iPad, or iPod touch, without having to install additional software. This feature makes it great for sharing on a network, so if you're running a coffee shop or a waiting room, for example, people can print without hassle. In terms of performance, this machine does very well. In its fastest setting, it can reach speeds of up to 30 pages per minute. Which leaves most of its competition behind. There's also double-sided printing which makes documents look a little more professional and helps you save on paper. Another great paper saving feature is Nup printing.

This allows you to print more than one page of a document on a side of the paper. Print Settings You could condense up to 25 pages of a document into one side of A4 paper. Poster printing is the opposite. This allows a document to be spread over as many as 25 A4 sheets of paper. Great for getting big prints, without the big printer. The print text in black features is also one to note. Colored text can sometimes be a real pain for mono printers, but with this machine, you just enable the feature, and all the text in your document is converted to black. Finally, there's a feature called PDF Archive, which is extremely useful if you want to keep a digital copy of everything you print. This makes a PDF version of every job you send to the printer and stores it on your computer. This way, if you ever lose a printout, you know exactly where to look to get a new one. There you have it, The Brother hll2360dn printer. Perfect for lower print volumes, easy to set up and use, and with all of the paper-saving features, it's cost-effective too. Brother hll3290cdw digital color laser printer This Brother printer comes up with a six-foot power cable, driver and software CD, a quick setup guide, and an instruction manual. The good thing with brother printer is that the user interface or network settings, to connect Wifi on brother printer setup is more or less the same. However, one needs to be smart enough to understand and remember the given feature. Baby Steps to Connect The Brother Laser Printer. Remove all the tape and guard pieces. Noted in these instructions will open the lid of the printer by pressing up on the handle in the middle. Then Lifting it until the lid locks into place inside for toner cartridges. Preinstalled yellow, magenta, cyan, and black indicated by these stickers on the right on both sides of each cartridge. Retract the yellow locking tabs then lift the cartridge out carefully.

Remove the orange plastic cover across the front of each cartridge by pulling out from the sides. Then remove the protective sheet in the compartment below. The cartridges reinstall the four cartridges in the same positions by matching the color to their corresponding slots. Then close the printer lid. Remove the bottom paper drawer by pulling it out until it stops. Then lift slightly and

remove the drawer completely. Remove the guard paper and desiccant package in this tray. Load up to 250 sheets of printer paper or legal paper before replacing the drawer. Brother hll3290cdw digital color laser printer Specifications The Brother hll3290cdw printer measures 16 inches wide, 14 inches high, and 18 inches deep. The weight of the printer with all the cartridges installed is just under 50 pounds. In the middle on the front is a single sheet document feeder for specialty papers like labels envelopes and cardstock. When the lid is open the height is 26 and a half inches and needs at least seven inches behind the printer to access the rear panel. In the back, the lower right corner is the USB port for wired connections. Though a cable is not included in the rear lower lefthand corner is the plug port for the power cable. The scanner bed lifts for clearing paper jams and theres a popout lift for multipage printouts. Steps to connect Wifi on Brother hll3290cdw digital color laser printer. Its a great printer and slightly different from other Brother printers in terms of network connecting settings. Hence, the following steps are useful to connect Wifi on this brother printer. Press the power button to turn the printer on. The first time you turn the printer on it will take about 2 minutes to fully initialize to set the printer up wirelessly. Dont press the WiFi button instead press menu. Then navigate down to network press ok and select WLAN. Press down to reach setup wizard and press ok. Select your SSID then key in the password when it asks for the network key.

Note Because of the LCD interface youll have to key in the password one character at a time by scrolling up or down through every number letters. Capital and lowercase, and symbol found on the keyboard to reach the right character. When youre done press ok. And then up to confirm the settings. While typing in the password was a bit annoying. I was able to connect on the first try and it only took a few minutes to complete. Instead of the setup wizard, you can try the WPS option. If your router supports it which doesnt require you to manually key in the password. Note that if you dont have a WiFi network that this printer does not support an Ethernet connection, and you would have to connect the printer via USB to a computer. Then connect directly to a devices WiFi. For example, using a mobile phone after setting up the printer wirelessly. Software download for Brother printer I installed the drivers and software by downloading them from the B rothers printer official website as I dont have a CD drive on my laptop. The software detected the printer right away. Installation took only a few more minutes. Now were ready for a test print. It only takes a few seconds for the information to be sent wirelessly from the laptop to the printer. Before it wakes up and starts printing for doublesided printing, It prints to one side first. Retract the page then print on the other side, and heres the final product as you can see the text is quite clear and crisp. For Color Printouts Press the color copy button and this takes about 20 seconds to finish for multiple copies or pages. It can print up to 25 pages per minute. For mobile printing from an Android device, youll need to install two apps mopriya print service and brother Iprint and scan app. Select the printer then choose print or scan. IOS device users can use A irPrint with this printer and wont need to install any apps. When we look at this printout we see that the printer doesnt seem to produce the full range of colors.

Drawbacks of this Printer The biggest drawback to scanning and copying on this machine is that there isnt an automatic document feeder. So this means, only process documents one at a time, one side at a time. Also, the 25 page per minute print speed applies only to singlesided. Pronounced dualsided printouts are about half the speed because the sides dont print simultaneously. Advantage of this Printer One nice and useful feature is the ability to passwordprotect your queued print documents, or even the scanner function with a pin. In addition to standard network security protocols, after creating a password, I can assign a user and create a job name. Then on the printer select secure print select the user and then the job. Then enter the password and confirm whether you want to print or delete this job. Overall this printer prints nice black and white text and basic color graphics. Decently well prints of detailed color photos, On the other hand, wont look nearly as impressive, and you wont be able to get a galleryquality printout of it for a small business, or home

office that mostly prints documents, and only has an infrequent need for small quantity scanning or photocopying. This printer does a great job. Its easy to set up and share in your home network provided you use WiFi. Also allows you to print from a mobile device or opt for a wired USB connection. How to set up your Brother laser printer 2340dw to use WiFi Connect Wifi on Brother laser printer 2340dw. This should work on almost all of the brother printers. Steps to connect Brother printer Wirelessly Make sure that the printer is on. If the printer is off, press the OK power button. The next step is to press the OK Button. Now check the printer, and if it's in an ideal model for a long time, then it might be possible that it's in a Deepsleep mode. Then Press OK to awake it in ready mode. By Pressing arrow keys, go to the network option. Then Press arrow keys and click OK Button.

The options will come up on the screen like Wlan, MAC Address., Wlan Status, and WPS with pin code, WPS AOSS setup wizard, and Wlan assistant. Choose the Setup Wizard option and press the OK button. With the help of the arrow button enable this option. Search for the SSID. Now check for the network name, which is in use, and click on it. Then enter the password and click ok to connect. The password is Case Sensitive, so choose according carefully. After Completion Finally presses OK Button. If in care it shows any message like password incorrect or failed connection, then repeat the above steps more carefully because it's quite normal for everyone to put the wrong password in their first attempt. Note To enter the password, click on the given field, and an onscreen keyboard will appear. Then with the help of UP and DOWN arrow keys, choose Numeric or symbols according to your password. Always remember the password which you are going to use is the one which you use for your Wireless Network To connect it wirelessly. If everything set up correctly, then a WiFi button starts flashing and shows that it's solid and connected. To check the connectively and rest of the settings, try to print a test page or any page you want.
