Unplug printer. With a Rinse them in water. Hope that helps! Should you have any further questions. I provided led you to, or resulted in a fix, please close the ticket with a FixYa! Thank you for using FIXYA. Cheers! IrishDruid Login to post It will not print and tells me that the Waste Ink absorber is full. Also a orange light flashes from green to orange. Can you tell me how I fix it. Although it is not always easy to get at. Usually once this happens it is time for a new printer. You can also contact Canon and see if they have a replacement part for this. Eight flashes indicates that this absorber is nearly full. Press the button on the printer to clear the error, so you can continue the print job. The printer will need to be serviced as soon as possible. Eight flashes indicates that this absorber is nearly full. The printer will need to be serviced as soon as possible. Please come back and just gave a vote, it will gave me some satisfaction to know am helping some one so I will keep on helping. All The Best Pineworks Over the life of the printer, the amount of ink that the ink absorber has absorbed is calculated by the printer. Eventually, after substantial use, the printer will enter an error condition when the ink absorber is nearly full. At this point, printing is still possible by pressing the button on the printer. To protect the printer from damage, you will not be able to print at all once the ink absorber is full. Canon recommends having the printer serviced before the absorber becomes full.

Replacing the ink absorber is a complicated and potentially messy procedure. Even if the ink absorber is successfully changed, the ink absorber counter must be reset. If you ask me its just another way these printer companies screw customers. Just my opinion. Sorry about the bad news but at least you have your answer. Sean It will not print and tells me that the Waste Ink absorber is full. Can you tell me how I fix it. Answer questions, earn points and help others. This page requires Javascript. Canons getting smarter. But if anyone still thinks he found an alternative way to fix it, I am happy to hear about it.

By the way, should it be possible to read and manage the eeproms data by a eeprom coder such as used in car garages to cleanup the mileage of the expensive cars etc. greetings DutchmenAny help you can provide will be greatly appreciated. Printer stopping printing not longer and then this procedure not helping. Press the printers RESUME button to restart printing. Could you please solve my problem Regards, Prabhata Panda Just look at the thing and use your brain. Its all pressure clipped in place, no screws at least on the S900 and similar models, probably still the same on this years models. Look for slots and triangles on the 960. On the i960 youll have to remove the power buttons assembly on the front take out the two screws, unplug the internal white electro connector plug CAREFULLY, then you can undo the last clip that holds the top in place. 2 No need to remove the ink cartridges in this process so dont. The mechanism is held down in place in the case by two screws at the very bottom on the outside bottom of the metal chassis inside. Remove these screws then lift up the mechanism. It should lift out fairly easily, but remain attached by wires just place it

on the top edge of the case. 3 You'll see the blackened from waste ink felt pads on the bottom. WEAR GLOVES this is skin indelible ink, the only thing that will get it off your hands is CLOROX. Period. There are two skinny pads that sit on top of a larger pad. Note how they fit together. 4 Lift the pads out and rinse out thorough in a sink until very little or no ink comes out. There's no need to use chemical or soap cleaners, just use plain water from the tap and the spray nozzle. Keep rinsing and squeezing the pads, but don't twist them like a towel, squeeze and fold in half however to really get the ink out. Lay flat in the sun for a few hours to dry.

Do an online web search if this doesn't work for your model, although this works or slight variations for many, including the 8200, the S800, and S900, and the i series like the i869, i950, i960, etc. Two main buttons on the top of the printer Power and the Resume. If you've reset the code first, then cleaned the pad, you're now ready to print again. Apabila tidak off tekan kembali tombol power sampai printer mati. 8. Selesai. Setelah di reset untuk printer ip2000, ip3000, ip4000 waste pad harus dibersihkan dan dikeringkan dulu kemudian dipasangkan kembali. sebagian kasus printer akan kembali blink bila waste pad tidak dibersihkan. Hati-hati membuka dan memasangkan kembali diusahakan tidak ada yang bergeser gear yang terdapat di atas waste pad. Untuk i6100, i6500 setelah direset tidak perlu di buka dan dibersihkan waste padnya. Karena tidak pernah blink kembali. Anything I can do to clean it myself and then reset the printer. What will it cost if canon repair it. They can not give me a quote without seeing the printer and they are 150km away from me. Is it worth taking the printer in for repairing? By the way I suggest NOT to perform those cleaning procedures using the printer software to your ink cartridges every time that you replace one, it is really not necessary and that is what fill your absorber. Now, when I try to print something, the printer takes in the paper and then when it starts to print, it immediately stops and will not go continue again. I then get a message that I should look in the manual for the error 5100. What should I do now? Anonymous I have a Canon iP2000 Pixma printer. I have two new cartridges installed but it will only print in colour. The colour is perfect and there is black ink available when I touch the end of the cartridge. This is Canon iP1000 Simplified Service Manual as used by official Canon service technician to maintain and repair the Canon iP1000 inkjet printer. Thank you, for helping us keep this platform clean.
